

## **ABSTRACT OF THE DISCLOSURE**

An optical fiber cable for air-blown installation includes optical fibers acting as a  
5 medium for transmitting optical signals; a tube binding the optical fibers; string fillers  
surrounding the outer periphery of the tube at a predetermined spacing, tensile members  
positioned between the string fillers to surround the outer periphery of the tube for  
improving the tensile force of the optical fiber cable; and an outer sheath formed in a  
flexuous shape to surround the outer circumferences of the string fillers and the tensile  
10 members.
